Living Eggs Program – Early Stage 1

Dear Parents/Carers,

On Monday 24th May, the “Living Eggs” Science program will be coming to our school for Kindergarten students. This program is part of our Science Unit which investigates ‘Living Things’. The “Living Eggs” program allows the children to see the chickens hatching from their eggs.

The company supplies an incubator for two weeks, which supplies warmth, humidity and ventilation to ensure a successful hatch. The chickens can be heard chirping in their shells up to 24 hours before hatching and then their “egg tooth” breaks open the shell when they are ready to be born. They will start to grow feathers in their first week.

Historically the cost of this program was passed onto parents, however this year it will be paid for by the school. Please return the permission note to your child’s teacher **before Wednesday 19 May 2021**.

Planned Activity title	Living Eggs Program – Early Stage 1
Lessons	24 May – 4 June 2020
Classes involved	All Kindergarten classes
Supervising Teacher	Class teachers
Cost	No cost to parents
